PREFACE

State-Approved Schools of Nursing—LPN/LVN 1991 presents the findings of NLN's annual survey of schools of nursing, covering the period between August 1, 1989 and December 31, 1990. The publication provides a comprehensive directory of all the over 1,000 licensed practical and vocational nursing programs in the U.S. (plus programs in the territories) with alphabetical state listings. A data bank of information on schools of practical and vocational nursing in the U.S. is maintained by NLN and is updated each year by questionnaires sent to each state board of nursing. Each program is then sent a survey to collect the data reported in this directory. The directory lists all state-approved nursing programs preparing students for LPN/LVN licensure. For each school, the following information is included: address, telephone number, director, NLN accreditation status, state board approval, financial support, administrative control—as well as number of admissions, enrollments, and graduations. Unless otherwise indicated, all schools listed are state-approved. Newly opened programs and those that have recently closed are listed at the end of the directory.

The footnote feature, introduced in the 1985 edition, is being continued. The footnotes are intended to help the reader understand some of the new options available to the contemporary nursing student as well as to clarify unusual features of some programs. A description of the footnotes appears on page 2 and it is suggested that you read it carefully.

A few schools have requested that the statistical information provided in the annual survey not be listed in the directory. This request has been honored in the school listings.

In this year's research publication, *Nursing DataSource 1991*, the complete findings of the League's LPN/LVN survey will be published in a separate module called *Focus on Practical/Vocational Nursing*. This module will report the updated nationwide trends for the LPN/LVN student population, spanning a 10–20 year period.

In addition, the annual compendium, *Nursing Data Review*, will include findings from this and other NLN research projects including RN student and nursing faculty data.
